Chapter 1 — Getting Started

What is Real Estate Due Diligence?

Real Estate Due Diligence is a platform that helps property buyers, agents, and legal/financial professionals make faster, more informed decisions. For any property you add, it automatically pulls data from multiple sources, calculates a risk score, and generates a comprehensive PDF report — in minutes, not days.

Creating an account

1. Open **http://localhost:3000** (or the deployed URL your team provides).
2. Click **Get Started** or **Sign Up** on the landing page.
3. Fill in your **full name, email, phone number, password**, and **role**:
 - **Buyer** — purchasing properties for personal use or investment
 - **Real Estate Agent** — managing listings on behalf of clients
 - **Legal Reviewer** — reviewing encumbrances and legal standing
 - **Financial Institution** — assessing mortgage/loan risk
4. Click **Create Account**. A 6-digit OTP is sent to your email.
5. Enter the OTP in the verification screen. Your account is created and you are logged in.

Tip: If you don't receive the OTP within 2 minutes, click **Resend OTP**. There is a 60-second cooldown between resends.

Signing in with Google

1. On the login page, click **Continue with Google**.
 2. Complete the Google account selector.
 3. If this is your first Google sign-in, you are asked to choose a role and provide a phone number — fill these in and click **Complete Sign Up**.
 4. You are logged in and redirected to the dashboard.
-

Logging in with email and password

1. Navigate to /login.
 2. Enter your registered **email** and **password**.
 3. Click **Sign In**.
 4. You will receive a login-alert email as a security notification (this is normal).
-

The Dashboard

After login you see the **User Dashboard** at /dashboard. It shows:

Card	What it shows
Total Properties	Number of properties you have added
Active Reports	Reports currently in progress or completed
Average Risk Score	Mean risk score across your portfolio
System Health	Platform operational status

Below the cards: - **Portfolio Value History** — line chart of your portfolio value over the last 30 days - **Recent Activity** — your last 10 actions (properties added, reports generated, etc.) - **Recommendations** — actionable suggestions based on your portfolio

Navigating the platform

Use the **sidebar** on the left to navigate:

Menu item	Page
Dashboard	Portfolio overview
Properties	Add and manage properties
Risk Assessment	View risk scores and breakdowns
Reports	View and download due-diligence reports
Comparable Properties	Compare similar properties nearby
Saved Comparisons	Your saved property comparison sets
Notifications	In-app alerts
Settings	Profile, password, notification preferences
Admin (<i>ADMIN only</i>)	Platform analytics and user management

Changing the display language

1. Click the **language selector** (globe icon) in the navigation bar.
2. Select one of the 11 available languages: English, Hindi, Bengali, Gujarati, Kannada, Malayalam, Marathi, Punjabi, Tamil, Telugu, Urdu.
3. The UI updates immediately. Your language preference is remembered in the browser.

ewpage

Chapter 2 — Adding Properties

Adding your first property

1. Click **Properties** in the sidebar, then click **Add Property** (or the + button).
2. Fill in the property details:

Field	Required?	Notes
Address	✓	Street address
City	✓	e.g. Chennai, Mumbai
State		e.g. Tamil Nadu
ZIP Code		Postal / PIN code
Property Type		Residential, Commercial, Industrial, Land, etc.
Area (sq ft)		Total built-up area
Market Value (₹)		Current estimated market value
Year Built		Construction year
Bedrooms / Bathrooms		For residential properties
Stories		Number of floors
Condition		Excellent / Good / Fair / Poor
Image URL		Link to a property photo

3. Click **Save Property**.

The property is saved immediately. In the background, the platform: - Geocodes the address to latitude/longitude (used for the map view) - Queues it for automatic risk scoring (first access triggers computation)

Viewing your properties

- Go to **Properties** in the sidebar to see all your properties in a card grid.
- Use the **search bar** at the top to filter by address, city, state, zip code, or property type.
- Click any property card to open its detail page.

Property detail page

The property detail page (/dashboard/property-search/[id]) shows:

- **Overview** — all fields you entered
- **Risk Score badge** — LOW / MEDIUM / HIGH / CRITICAL with the numeric score
- **Labels** — auto-applied tags (e.g. VERIFIED, HIGH_RISK, HOT_DEAL)
- **Action buttons:**
 - **View Risk Analysis** → opens the risk breakdown page
 - **Generate Report** → opens the report generation page
 - **View Comparables** → finds similar nearby properties
 - **Valuation** → automated market valuation

Editing a property

1. Open the property detail page.
2. Click **Edit** (pencil icon).
3. Update any field and click **Save Changes**.

Note: Editing a property does not automatically re-run the risk assessment. Use **Recalculate** on the Risk Analysis page if the data has changed significantly.

Deleting a property

1. Open the property detail page.
2. Click **Delete** (trash icon) and confirm when prompted.

⚠ **Warning:** Deletion is permanent. All associated risk assessments, reports, comparables, and valuations are also deleted.

Map view

Click the **Map** tab on the Properties page to see all your properties plotted on an interactive Leaflet map. Each pin shows the property address and risk level. Click a pin to jump to the property detail page.

Property labels

Labels are colour-coded tags automatically applied by the platform:

Label	Meaning
VERIFIED	The property's address data has been cross-verified
HIGH_RISK	Overall risk score is HIGH or CRITICAL
HOT_DEAL	Market value significantly below comparable properties

FLOOD_RISK Property is in a flood-prone area

Admins can also apply and remove labels manually.

ewpage

Chapter 3 — Risk Analysis

What is the risk score?

The risk score is a number from **0 to 100** where a higher score means higher risk. It is computed across 6 categories using a rule-based engine — no black-box AI.

Risk Level	Score range	Badge colour
LOW	0-25	Green
MEDIUM	26-50	Yellow
HIGH	51-75	Orange
CRITICAL	76-100	Red

The 6 risk categories

Category	Weight	What it measures
Flood	25%	FEMA flood zone classification
Legal	20%	Encumbrances, litigation, title clarity
Tax	15%	Outstanding taxes, arrears, dues
Zoning	15%	Zoning classification, variance risks
Environmental	15%	Hazardous materials, contamination history
Market	10%	Price volatility, days on market, demand index

The **overall score** is the weighted average of all 6 category scores.

Viewing the risk analysis

1. Open a property's detail page.
2. Click **View Risk Analysis**.
3. You are taken to `/properties/[id]/risk-analysis`.

The risk analysis page shows:

- **Risk Gauge** — circular dial with the overall score and level
- **Radar Chart** — hexagonal chart comparing all 6 category scores at a glance
- **Risk Factor Cards** — one card per category, each showing:
 - Category score
 - Risk level badge

- **Explanation** — what data was used and why the score is this value
 - **Recommendation** — concrete action to reduce risk
 - **Data Source** — which provider supplied the data
-

Recalculating the risk score

If you have updated the property data or want fresh data from providers:

1. On the Risk Analysis page, click **Recalculate**.
 2. A spinner appears while the calculation runs (usually 2-5 seconds).
 3. The previous assessment is saved to history; the new score becomes the current one.
-

Risk score history

The platform keeps every previous risk calculation.

1. On the Risk Analysis page, scroll to **Risk History**.
 2. Each past assessment shows the date, score, level, and delta (change from the previous score).
 3. Use this to track whether risk is improving or worsening over time.
-

Understanding the explainability panel

Click **How is this score calculated?** (the **i** button) to open the explainability panel. It shows:

- The formula: overall score = Σ (category score $\times$ category weight)
 - Category weights as a percentage bar chart
 - Threshold boundaries (score ranges for each level)
 - A note on **data uncertainty**: if a data provider was unavailable, a conservative penalty is applied rather than assuming zero risk.
-

Risk score on property cards

Every property card in the search results and dashboard shows a small risk badge (LOW / MEDIUM / HIGH / CRITICAL). This updates whenever the risk assessment is recalculated.

ewpage

Chapter 4 — Generating Reports

What is a due diligence report?

A due diligence report is a comprehensive PDF document covering everything a buyer or lender needs to know about a property. It includes:

1. **Cover Page** — property photo, address, report date, risk badge
 2. **Executive Summary** — key findings and recommendation (AI-generated)
 3. **Property Overview** — all property fields and metadata
 4. **Risk Analysis** — detailed risk breakdown for all 6 categories
 5. **Comparable Properties** — nearby similar properties and price comparison
 6. **Financial Analysis** — market value, valuation methods, price-per-sqft
 7. **Recommendations** — prioritised list of actions to reduce risk
 8. **Appendix** — raw data sources and methodology notes
-

Generating a new report

1. Open the property's detail page.
2. Click **Generate Report**.
3. You are taken to `/properties/[id]/generate-report`.
4. Review the pre-filled details (title, included sections).
5. Click **Generate**.

The report generation is **asynchronous** — it runs in the background while you continue using the platform. You can monitor progress: - A progress bar appears on the Generate Report page. - A notification appears in the bell icon when the report is ready.

Typical generation time: 10–30 seconds depending on data provider response times.

Monitoring report status

Go to **Reports** in the sidebar (`/reports`) to see all your reports.

Status	Meaning
PENDING	Queued, not yet started
GENERATING	In progress
COMPLETED	Ready to view and download
FAILED	Generation failed — try regenerating

Viewing a completed report

1. Go to **Reports** and click on a completed report card.
 2. The report viewer opens showing all sections inline.
 3. Use the section navigation to jump to specific parts.
-

AI executive summary

Each completed report includes an **AI Executive Summary** at the top:

- **Verdict** — PROCEED / PROCEED WITH CAUTION / DO NOT PROCEED
- **Key findings** — 3-5 bullet points highlighting the most important risks and positives
- **Recommended next steps** — specific actions to take before completing the transaction

To regenerate the AI summary (e.g. if the risk data has changed): 1. Open the report. 2. Click **Regenerate Summary** (↻ icon next to the summary).

Downloading a report

From the report viewer: - Click **Download PDF** to get the full PDF. - Click **Download Excel** to get a structured Excel workbook with all data.

From the Reports list page: - Hover over any completed report card and click the download icon. - You can also bulk-download multiple reports (see [Chapter 6 — Exporting Data](#)).

Regenerating a report

If property data has changed significantly: 1. Open the report in the viewer. 2. Click **Regenerate**. 3. A new version is created. The old version is preserved in report history.

Report history

Click **Report History** in the sidebar (/dashboard/report-history) to see every version of every report. You can: - Download any past version - Share a report via email - Archive reports you no longer need

Sharing a report

1. Open the report viewer.
2. Click **Share** (🔗 icon).
3. Enter the recipient's email address.
4. Click **Send** — the recipient receives the report PDF by email.

Reports can also be shared via a read-only public link (ask your Admin to enable this).

Report limits by plan

Plan	Reports per month
------	-------------------

FREE	3
PRO	50
BUSINESS	Unlimited
ENTERPRISE	Unlimited

If you reach your limit, upgrade your plan at </dashboard/billing>.

ewpage

Chapter 5 — Comparing Properties

Comparable property analysis

Comparable property analysis finds similar properties near your target property and compares their prices, areas, and other attributes. This helps you determine whether the asking price is fair.

Viewing comparables

1. Open a property's detail page.
2. Click **View Comparables**.
3. You are taken to `/properties/[id]/comparables`.

The comparables page shows:

- **Interactive Map** — your property in blue; comparable properties as coloured pins (green = very similar, yellow = similar, orange = somewhat similar)
 - **Comparable Cards** — each card shows:
 - Address and distance (km)
 - Similarity score (0-100%) and similarity level badge
 - Price per sq ft vs your property
 - **Better Deal indicator** — shown if this comparable is priced below market
 - **Comparables Table** — side-by-side table for detailed comparison
-

Adjusting the search radius

Use the **Radius Selector** buttons above the map to filter comparables by distance:

Button	Radius
1 km	Very close neighbourhood
3 km	Local area
5 km	<i>(default)</i>
10 km	Wider area

Advanced search

For more control over which comparables are returned:

1. Click **Advanced Search**.
2. Set filters:
 - **Price range** — minimum and maximum market value
 - **Area range** — minimum and maximum sq ft
 - **Property type** — match only the same type
 - **Max distance** — override the radius selector
3. Click **Search**.

Results are saved as a new comparable analysis record.

Price trends

Below the comparables map, the **Price Trends** chart shows:

- Historical price-per-sqft values for the comparable market over the past 12 months
- Your property's price-per-sqft plotted against the trend

Use this to assess whether the market is rising, stable, or declining.

Property valuation

The platform can automatically estimate your property's value using three methods:

1. Open a property's detail page.
2. Click **Valuation** (or go to /properties/[id]/valuation).

Valuation methods

Method	How it works
Comparable Sales	Adjusts prices of nearby sold comparables for size, age, and condition
Cost Approach	Estimates replacement cost of the structure plus land value
Income Approach	Capitalises estimated rental income at a market cap rate

Triggering a valuation

Click **Calculate Valuation** to run a fresh computation. The result shows: - **Estimated Value** (₹) - **Confidence Range** — low and high estimates - **Method** — which approach was used (the one with the most available data)

Methods breakdown

Click **Methods Breakdown** to see all three estimates side by side in a bar chart. This is useful when the three methods diverge — a large gap may indicate data quality issues.

Saving a comparison

To save a set of properties for later comparison:

1. Select properties using their checkboxes in the search results.
2. Click **Save Comparison**.
3. Enter a name (e.g. "Chennai 2BHK options — August 2025") and optional notes.
4. Click **Save**.

Access saved comparisons at **Saved Comparisons** in the sidebar.

Managing saved comparisons

Go to /dashboard/saved-comparisons to:

- View all saved comparisons
- Edit the name or notes
- Open the comparison (loads all properties for side-by-side view)
- Delete comparisons you no longer need

ewpage

Chapter 6 — Exporting Data

Export formats

The platform supports two export formats:

Format	Use case
PDF	Share with clients, lawyers, or lenders; print-ready
Excel (.xlsx)	Further analysis in spreadsheets; structured tabular data

Exporting a single report

From the report viewer

1. Go to **Reports** and click on a completed report.
2. In the report toolbar, click:
 - **Download PDF** — generates and downloads the full PDF report
 - **Download Excel** — generates and downloads the Excel workbook

File naming

Files are named automatically:

DueDiligence_Report_<title>_v<version>_<date>.pdf
DueDiligence_Report_<title>_v<version>_<date>.xlsx

Exporting a property snapshot

For a quick one-page summary without generating a full report:

1. Open the property detail page.
2. Click the **Export** button (↓ icon) in the top-right.
3. Select **PDF Snapshot** or **Excel Snapshot**.

Property snapshots include: property details, current risk score, and labels. They do not include comparables, financial analysis, or AI summary.

Bulk export (multiple reports)

To download several reports at once as a ZIP file:

1. Go to **Reports** (/reports).
 2. Check the boxes next to the reports you want.
 3. Click **Bulk Export** (appears in the toolbar when any report is selected).
 4. Select **PDF** or **Excel**.
 5. Click **Download ZIP** — all selected reports are packaged into a single .zip file.
-

Export history

Every export you generate is recorded in **Export History** (/reports/export-history).

The history shows: - File name and format - File size - Date generated - Download count

To **re-download** a past export: 1. Find it in Export History. 2. Click the **Download** icon.

Note: If the original report was deleted after the export was generated, the file may no longer be available (shown as “Expired”). Generate a new export instead.

Admin analytics export

Administrators can export the entire admin analytics dashboard:

1. Go to **Admin Dashboard** (requires ADMIN role).
2. Click the **Export** dropdown.
3. Select:
 - **Excel (.xlsx)** — 4 sheets: Summary, Risk Distribution, Reports Trend, Top Cities
 - **CSV** — same data as comma-separated text
 - **PDF** — formatted analytics report

The export respects the selected **time period** (7d / 30d / 90d) and supports **11 languages** — the language is set automatically based on your UI language preference.

Export in other languages

Report PDFs and analytics exports support all 11 platform languages. Switch your UI language before exporting — the exported PDF will use that language's translations.

Supported languages for export: English, Hindi, Bengali, Gujarati, Kannada, Malayalam, Marathi, Punjabi, Tamil, Telugu, Urdu.

Audit log export (Admin only)

Admins can export the audit log for compliance purposes:

1. Go to **Admin** → **Audit Logs**.
2. Apply any filters (date range, action type, user).
3. Click **Export** and select CSV or Excel.

ewpage

Chapter 7 — Account Management

Viewing your profile

1. Click your name or avatar in the top-right corner of the navigation bar.
2. Select **Profile** (or go to /dashboard/profile).

Your profile shows: - Full name - Email address - Phone number - Role - Profile picture (Google-linked accounts show the Google photo) - Account creation date

Updating your profile

1. Go to /dashboard/profile.
2. Click **Edit Profile**.
3. Update your **full name**, **phone number**, or **profile picture URL**.
4. Click **Save Changes**.

Note: Email address and role cannot be changed from the profile page. Contact an administrator to change your role.

Changing your password

1. Go to **Settings** → **Security** (or /dashboard/settings).

2. Click **Change Password**.
 3. Enter your **current password** and your new password (minimum 8 characters).
 4. Click **Update Password**.
-

Resetting a forgotten password

1. Go to /login.
 2. Click **Forgot password?**
 3. Enter your registered email address and click **Send OTP**.
 4. Check your email for a 6-digit OTP and enter it.
 5. Set your new password and click **Reset Password**.
-

Notification preferences

Control which notifications you receive and how:

1. Go to **Settings** → **Notifications** (or /settings/notifications).
2. Toggle each notification type on or off per channel:

Notification type	Email	In-app
Report Ready	✓ on	✓ on
Risk Alert	✓ on	✓ on
Price Change	off	✓ on
System	✓ on	✓ on

3. Changes are saved automatically.
-

Viewing notifications

Click the **bell icon** (🔔) in the navigation bar to open the notifications panel.

The panel shows your recent notifications grouped as **Today**, **Earlier**, and **Older**. Click any notification to navigate to the relevant page (e.g. a completed report).

To mark all as read: click **Mark all read** at the top of the panel. To clear all: click **Clear all**.

For the full notification history, click **View all** → /dashboard/notifications.

Managing your subscription

1. Go to **Settings** → **Billing** (or /dashboard/billing).
2. Your current plan and usage are shown:
 - Current plan (FREE / PRO / BUSINESS)
 - Reports generated this month
 - Reports remaining

- Plan expiry date (for paid plans)

Upgrading your plan

1. On the Billing page, click **Upgrade**.
2. Select a plan (PRO or BUSINESS).
3. Click **Subscribe** — you are redirected to the Cashfree checkout (UPI, cards, net banking).
4. Complete payment. Your plan is activated within seconds after the payment webhook is received.

Cancelling your plan

1. On the Billing page, click **Cancel Plan**.
 2. Confirm cancellation.
 3. Your access continues until the current billing period ends.
-

Logging out of all devices

If you suspect your account has been accessed without permission:

1. Go to **Settings → Security**.
 2. Click **Log out all devices**.
 3. All active sessions (on all browsers and devices) are immediately invalidated.
 4. You are redirected to the login page.
-

Deleting your account

⚠ **This is irreversible.** All your properties, reports, risk assessments, and data are permanently deleted.

1. Go to **Settings → Account**.
2. Click **Delete Account**.
3. Enter your **current password** and type DELETE to confirm.
4. Click **Delete My Account**.

Your account and all associated data are immediately and permanently removed.

Security best practices

- Use a strong password (12+ characters, mix of letters, numbers, symbols).
- Enable Google Sign-In for faster and more secure login.
- Log out of all devices if you change your password.
- Never share your credentials with anyone.
- Contact your administrator if you notice unexpected login-alert emails.
